

HTML Lab Assignment 6

11/02/2022

Following along the example of HTML Canvas example, to learn how make game. (https://www.w3schools.com/graphics/game_intro.asp). In the example on the page of introducing “Game Components”, there is an example “Moving Component” which make all three components move in different directions. (https://www.w3schools.com/graphics/tryit.asp?filename=trygame_component_more_move)

Initially, the Red cube moves rightward along the horizontal direction; the yellow cube moves both rightward and downward ; the blue cube moves rightward and upward. Please rewrite the code to make the three cubes bouncing inside the canvas. i.e. when the hit the walls, they bounce back to oppsite direction.
